Editor-in-Chief

Prof. Dr. Stanley T. Omaye

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal, Antioxidants serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, Antioxidants has become a key forum for researchers to bring their findings to the forefront.

Author Benefits

Open Access  Unlimited and free access for readers
No Copyright Constraints  Retain copyright of your work and free use of your article
High Visibility  Indexed by the Emerging Sources Citation Index (ESCI - Web of Science), PubMed (NLM); Scopus (Elsevier)
Thorough and Rapid Peer-Review
Fast Publication upon Acceptance
No Space Constraints, No Extra Space or Color Charges  No restriction on the length of the papers, number of figures or colors
Discounts on Article Processing Charges (APC)  If you belong to an institute that participates with the MDPI membership program
Major Forum for Readers Interested in Antioxidants and Oxidative
**Aims and Scope**

*Antioxidants* publishes original research, reviews, short communications, and commentaries. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers.

The scope of *Antioxidants* includes:

- Evaluation of *in vivo* and *in vitro* antioxidant capacity
- Antioxidant metabolism in biological systems
- Elucidation of antioxidant mechanisms
- Innovative techniques of antioxidant delivery and protocols for the extraction, isolation, structural characterization of new natural antioxidants
- Natural or synthetic antioxidants and their relevance to health and disease
- Relationships between antioxidant properties and human health promotion
- Dietary antioxidants
- Safe antioxidant preservatives for foods, fodder and cosmetic formulations
- Industrial uses for preventing the oxidative degradation of polymers such as rubbers, plastics and adhesives
