

Machine Learning in Structural Dynamic Analysis and Health Monitoring

Guest Editors:

Prof. Dr. Yun Lai Zhou

State Key Laboratory for Strength and Vibration of Mechanical Structures, School of Aerospace Engineering, Xi'an Jiaotong University, Xi'an 710049, China

Prof. Dr. Gilbert-Rainer Gillich

Department of Engineering Science, Babeş-Bolyai University Cluj-Napoca, 320085 Resita, Romania

Deadline for manuscript submissions:

closed (7 May 2021)

Message from the Guest Editors

This Special Issue aims to summarize the recent advances in machine-learning-based structural dynamic analysis and structural health monitoring (SHM), considering the various approaches that have been developed and put forward for application in health monitoring and periodic inspection in civil, mechanical and aerospace engineering. Numerical analysis has also experienced rapid development for use in structural dynamic analysis, such as in the case of genetic-algorithm-based structural dynamic optimization. This Special Issue also welcomes investigations on algorithm development, deep learning, signal processing, data management and so on. High-quality investigations regarding machine learning based SHM and damage identification are encouraged, as are reviews summarizing advances over recent years.

Message from the Editor-in-Chief

The Editor-in-Chief invites contributions of research articles or reviews for publication in *Applied Mechanics* (ISSN 2673-3161). *Applied Mechanics* is an international peer-reviewed open access journal published quarterly, and covers a wide range of topics related to mechanics of solids and structures and its engineering applications. Contributions are welcome on recent scientific research and development using different research techniques such as analytical, numerical, and experimental methods. We also invite you to offer any proposals for Special Issue topics that you feel would be of interest.

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **ESCI (Web of Science)**, **Scopus** and **other databases**.

Journal Rank: CiteScore - Q2 (Engineering (miscellaneous))
