

Research on Networked Embedded Systems

Guest Editors:

Dr. Leandro Dias da Silva

Computing Institute, Federal
University of Alagoas, Maceio,
Brazil

Dr. Álvaro Sobrinho

Center for Technological
Innovation and
Entrepreneurship, Federal
University of the Agreste of
Pernambuco, Garanhuns 55292-
270, Brazil

Prof. Dr. Angelo Perkusich

Intelligent Software Engineering
Group (ISE/VIRTUS), Federal
University of Campina Grande
(UFCG), Campina Grande, PB,
Brazil

Deadline for manuscript
submissions:

closed (20 September 2024)

Message from the Guest Editors

Embedded systems are pervasive in our daily lives. They are not stand-alone anymore but networked. With advances in devices and network technologies, new vertical applications are arising, with potential societal changes. For example, 5G networks, IoT, and wireless sensors allow a new era of applications in industry 4.0, healthcare, agriculture, smart cities, etc.

The development and deployment of networked embedded systems pose new engineering challenges. New tools and approaches are needed for the (software) engineering of current (real-time) cyber-physical systems of systems. For instance, verification and validation of such systems to ensure safety and security are necessary.

- networked embedded systems
- IoT
- 5G networks
- wireless sensor networks
- validation and verification for safety and security
- machine learning
- software engineering
- systems of systems
- cyber-physical systems
- real-time systems

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
