submissions:

25 June 2024

Message from the Guest Editor

Dear Colleagues,

In recent years, CAD/CAM technology has improved daily clinical dental practice, especially in prosthetic dentistry. Intraoral scanners, facial scanners, 3D printers, milling machines, and new dental materials have revolutionized the prosthetic workflow, decreasing the operative time and cost and increasing accuracy.

The purpose of this Special Issue is to cover articles regarding CAD/CAM technology applied in dentistry. Moreover, it is recommended to investigate new dental materials as well as their mechanical characteristics, potential future applications, and limitations in daily clinical practice.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
