

Advanced Image Analysis and Processing Technologies and Applications

Guest Editors:

Dr. Guoxia Xu

Department of Computer
Science, Norwegian University of
Science and Technology, 2815
Gjovik, Norway

Prof. Dr. Hu Zhu

School of Communication and
Information Engineering, Nanjing
University of Post and Tele
Communications, Nanjing, China

Deadline for manuscript
submissions:

30 September 2025

Message from the Guest Editors

Dear Colleagues,

Image analysis and processing have far-reaching applications, and data-driven technologies have sought to explore their use across various domains. From medical imaging for disease diagnosis to autonomous vehicles relying on vision systems, we have entered a new era where digital images play a pivotal role in diverse domains. This also poses new challenges due to the limited amount of data in some real cases where there is a scarcity of training data available. Therefore, this Special Issue aims to present new ideas and experimental results on pattern recognition, machine learning, computer vision, and image analysis.

Potential topics include, but are not limited to, the following:

- computational imaging technology and applications;
- bio-medical image processing and applications;
- aerial image processing and applications;
- hyperspectral and multispectral image processing and applications;
- infrared and visible image processing and applications;
- model-driven methods in image processing;
- data-driven methods in image processing;
- knowledge-driven methods in image processing.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
