# Dental Biomaterials: Latest Advances and Prospects in Restorative Dentistry

Guest Editors:

**Dr. Cristina Gasparik**

**Dr. Codruţa Saroşi**

**Dr. Horaţiu Alexandru Colosi**

**Dr. Javier Ruiz-López**

Deadline for manuscript submissions:
**closed (20 May 2023)**

## Message from the Guest Editors

Restorative dentistry has seen remarkable progress in recent years, mainly due to its implementation into the daily clinical practice of digital workflows and novel dental materials. The continuous improvement of modern manufacturing technologies such as CAD/CAM and 3D printing requires the constant development of highly specialized dental materials with improved characteristics and properties.

This Special Issue aims to focus on the latest advancements in the dental biomaterials used in restorative dentistry, considering their composition; biological, mechanical, and optical properties; and the latest manufacturing technologies used for their processing.

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.
**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
