Aalen University, Aalen, Germany

Deadline for manuscript
submissions:

closed (23 August 2021)

Message from the Guest Editor

Compared to other imaging methods (e.g., X-ray or NMR tomography) optical bioimaging has traditionally been limited due to its associated light scattering and low penetration depth within tissue. However, in recent years, the range of available wavelengths has been extended, novel imaging methods have been developed, and techniques of optical clearance have been applied in order to reduce light scattering considerably.

This Special Issue will present a collection of papers on structural and functional optical bioimaging. Authors are invited to submit papers related to microscopy, endoscopy, and other imaging modalities in area including 3D imaging, optical tomography, super-resolution, as well as spectral or fluorescence lifetime imaging. In addition to fluorescence methods, papers related to elastic or inelastic light scattering, opto-acoustics, OCT, or Terahertz imaging are highly welcome, covering the whole field from basic research to clinical (diagnostic or therapeutic) applications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
