Message from the Guest Editors

Dear Colleagues,

We invite authors to contribute original research articles, as well as review articles, that will contribute to the area in asphalt materials and paving technologies. The advanced materials shall conform to the goal of applied science, and also promote new technology, low cost, high durability, environmental friendliness, and effective resource usage.

Potential topics include, but are not limited to:

- Advanced asphalt materials such as polymer modified asphalt, rubber asphalt, bio-asphalt
- Advanced technologies such as warm mix asphalt, cold mix asphalt
- Innovative pavement or material design protocols
- Recycling materials for pavement purposes
- Advanced asphalt pavement construction and maintenance strategies

Prof. Zhanping You
Prof. Dr. Feipeng Xiao
Prof. Dr. Qingli (Barbara) Dai

Author Benefits

Open Access: free for readers, with publishing fees paid by authors or their institutions.

High visibility: Indexed by the Science Citation Index Expanded (Web of Science) [search for "Applied Sciences-Basel"], Scopus, INSPEC (IET) and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 24 days after submission; acceptance to publication is undertaken in 8 days (median values for papers published in this journal in 2016).
