

axioms

Dear Colleagues,

On behalf of the Evaluation Committee, I am pleased to announce the winner of the 2018 *Axioms* Travel Awards.

This Award is granted to **Nurgissa Yessirkegenov**, a PhD student in Professor Michael Ruzhansky's group at Imperial College London, whose recent research mainly focuses on analogues of some classical functional inequalities and their applications. He will give a talk about "Hypoelliptic functional inequalities" at the 12th International ISAAC Congress in Aveiro, Portugal.

2018 TRAVEL AWARD WINNER

This award contributes 800 Swiss Francs towards his attending this conference.

This was a difficult decision, as high-quality applications were made for this award, and we would like to thank all the applicants for submitting their diverse and thought-provoking presentations. We congratulate Mr. Yessirkegenov on his accomplishment.

Prof. Dr. Humberto Bustince
Editor-in-Chief, Axioms
