Fractional Differential Equations

Guest Editor:

Prof. Dr. Gaston M. N'Guerekata

School of Computer, Mathematical and Natural Sciences, Morgan State University, Baltimore, MD 21251, USA

Deadline for manuscript submissions: closed (20 December 2018)

Message from the Guest Editor

During the last decade, there has been an increased interest in fractional dynamics, as it was found that to play a fundamental role in the modeling of numerous phenomena, in particular, complex media, and longmemory media, or porous media. The aim of this Special Issue is to present recent developments in the theory, analytic as well as numerical. Potential topics include but are not limited to existence, stability, oscillatory and asymptotic behavior of solutions, numerical results, and applications in sciences and engineering.
