Sodium-Ion Battery: Materials and Devices

Guest Editor:

Message from the Guest Editor

Prof. Dr. Emma Kendrick WMG, University of Warwick,

Coventry, CV4 7AL, United Kingdom

Deadline for manuscript submissions: closed (31 May 2018) Dear Colleagues,

Room-temperature sodium-ion batteries (NIBs) may offer key benefits over other commercial battery technologies such as lithium-ion batteries and lead-acid batteries in cost, safety, and performance. NIB technology is still in its infancy, and despite recent advances, significant knowledge gaps still exist. Sodium-ion cell chemistries require research into materials, electrochemical testing methods, materials processing for electrodes, novel electrolyte systems, and a greater knowledge of the failure mechanisms for safety and performance. This special issue "Sodium-Ion Battery: Materials and Devices" will focus on aspects of advancements in sodium-ion technology.

Specialsue

Prof. Dr. Emma Kendrick *Guest Editor*

Keywords

- sodium-ion batteries
- NIB
- SIB
- electrode
- electrolyte
- cathode
- anode
- cell design
- safety
- failure mechanism
- degradation

Editor-in-Chief

Prof. Dr. Andreas Jossen Institute for Electrical Energy Storage Technology (EES), Technical University München (TUM), Arcisstrasse 21, 80333 Munich, Germany

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec,

Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Electrochemistry) / CiteScore - Q2 (Electrochemistry)
