Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editors

Dear Colleagues,

Cardiolipin (CL) is a mitochondria-exclusive phospholipid that plays a pivotal role in mitochondrial architecture and function. In recent years, advances in lipidomic techniques and in vivo approaches have provided novel insights into cardiolipin metabolism and homeostasis. Moreover, aberrant CL content, structure and localisation are linked with ageing and neurodegeneration. CL has also emerged as a potential disease biomarker and pharmacological target aimed at restoring mitochondrial function. This Special Issue welcomes submissions of original research and review articles that focus on the contribution of CL to cellular homeostasis and pathophysiology. The aim is to deliver an overview of the expanding biological functions of CL and the contribution of impaired CL metabolism towards human disease states.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
