### Message from the Guest Editors

In this Special Issue, we aim to present new insights into the underlying cellular and molecular interactions of biomaterials for hard and soft tissue regeneration. We invite you to submit studies describing new biological aspects of both new and already available biomaterials, and innovative material-processing techniques related to the healing processes of soft and hard tissues. Contributions in the form of reviews and/or original papers are both welcome.

Deadline for manuscript  
submissions:

**closed (30 April 2022)**
