Editor-in-Chief's Choices in Biomedical Informatics

Guest Editor:

Prof. Dr. Alexandre G. De Brevern

Department of Biological Research on the Red Blood Cells, INTS, INSERM UMR_S 1134, Université de Paris, Université de la Réunion, 75739 Paris, France

Deadline for manuscript submissions:
31 December 2024

Message from the Guest Editor

Dear Colleagues,

The Editor-in-Chief's Choice in Biomedical Informatics is an esteemed anthology, meticulously curated to highlight the forefront of transformative methodologies in the convergence of biomedical sciences and informatics. Spanning bioinformatics, computational biology, medical imaging analysis, artificial intelligence, and machine learning, this seminal Issue embodies the intellectual rigor and visionary insights driving informatics in healthcare. Each article serves as a testament to scholarly depth, exploring intricate algorithmic frameworks and groundbreaking applications fostering precision medicine, clinical decision support systems, and predictive healthcare analytics. Please note, this exclusive collection does not entertain submissions for brief reports. Instead, it presents comprehensive studies and visionary analyses, transcending traditional boundaries and illuminating the pivotal role of informatics in advancing biological understanding, with the goal of transforming healthcare and inspiring process at novel scientific frontiers.
