Message from the Guest Editors

Dear Colleagues,

The Special Issue entitled "Bioinspired Strategies for Composite Coatings" aims to present recent research on any aspect of composite materials. Some of its focal points include, but are not limited to, the following:

Structural design and control of polymer materials based on the structure of animals and plants in nature.

Study about the performance of polymer materials through biomimetic structural design, such as anti-corrosion, barrier, mechanical, etc.

The applications about anti-corrosion coatings, barrier coatings, high-performance coating or composites.

Prof. Dr. Fei Zhou
