Deadline for manuscript
submissions:

closed (31 October 2024)

Message from the Guest Editors

There are no adequate animal or cellular models of the chronic, insidious development of Parkinson's Disease (PD) and most non-motor symptoms that affect patients. Therefore, clinical research is essential to better understand the genesis, progression, and treatment of PD. Furthermore, genetic influences can only be studied using clinical studies. Quality of life is one of the most important aspects for patients; thus, more research about its determinants using observational studies is required. Finally, new treatments for non-motor features and improved therapies for motor symptoms are urgently needed.

This Special Issue includes the most recent and cutting-edge research on clinical aspects of PD, including diagnosis, the assessment of motor and non-motor symptoms, biochemical testing, the evaluation of prognostic factors, the development of machine learning/artificial intelligence algorithms, and the evaluation of treatments' efficacy and safety. All kinds of papers, including original articles, briefs reports, opinions, reviews, and meta-analysis papers, are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
