Message from the Guest Editor

In parallel with a decrease/stabilization in the use of internationally controlled drugs, the market of novel psychoactive substances (NPS) continues increasing, year after year, with the Internet playing a pivotal role in contributing to this complex scenario. At times, although misleading, the terms 'legal highs' or 'research chemicals' have been used to describe these molecules. Overall, about 5% of 19–24-year-old European people have already experimented with them, because both NPS' intense psychoactive effects and their virtual non-detectability in routine drug screenings.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
