Message from the Guest Editor

Dear Colleagues,

The endocrine environment is involved not only in breast cancer development and progression, but also in the effect of treatment. The endocrine environment affects the immune microenvironment and angiogenesis, which are major players in breast cancer progression and treatment. In this Special Issue, it will be discussed how the endocrine environment affects the effect of breast cancer treatment through different mechanisms, such as modulation of the immune environment and angiogenesis, and future perspectives for new treatment strategies will also be discussed.

Dr. Takayuki Ueno

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
