Message from the Guest Editors

Dear Colleagues

It has been estimated that by 2030 half of all global deaths will be from cancer. As we age, our risk of cancer increases and thus, as the global population ages, the prevalence of disease will increase. Severe premature ageing syndromes give us some insight into the molecular pathways governing both the ageing process and cancer risk; however, much remains to be discovered. This special issue focuses on novel advances in the understanding of the molecular mechanisms that underlie the cancer and ageing processes.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
