Facts about the MDPI Community

70 open access journals
 70 staff at your disposal
 4000 academic editors
 15,000 articles published
 26,000 e-mail alert subscribers
 60,000 unique authors
 150,000 academic peer-reviewers
 600,000 monthly PDF views
 2,400,000 monthly abstract views

Catalysts is an independent open access
 journal published by MDPI

www.mdpi.com

See www.mdpi.com/about/contact/ for a full list of offices and contact information. MDPI AG is a company registered in Basel, Switzerland, No. CH-270.3.014.334-3, whose registered office is at Kandererstrasse 25, CH-4057 Basel, Switzerland.

catalysts Call for Papers

Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Catalysts* (ISSN 2073-4344). *Catalysts* is an international open access journal of catalysts and catalysed reactions.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted online to the Editorial Office at www.mdpi.com. Detailed instructions for authors are also available online: www.mdpi.com/journal/catalysts/instructions/

Catalysts is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published.

Catalysts is a new journal and publication fees are fully waived for papers submitted in 2012. However, a fee of 250 CHF may apply for those articles that need major editing and formatting and/or English editing.

We would be pleased to welcome you as one of our authors.

Aims & Scope

Catalysts publishes reviews, regular research papers (articles) and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible.

Therefore, there is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.

The scope of *Catalysts* includes:

- heterogeneous catalysis
- homogeneous catalysis
- biocatalysts, enzymes, enzyme catalysis
- electrocatalysts
- organocatalysis
- autocatalysis
- catalytic cycle
- phase transfer catalyst
- acid catalysis
- chemical equilibrium, activation energy
- precatalysts, cocatalysts, promoters in cooperative catalysis, inhibitors

Catalysts regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: www.mdpi.com/journal/catalysts/

Open Access. What Does It Really Mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need—no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
