Air and Water Purification Processes through Photocatalysis: Scale Up Perspectives

Guest Editors:

Dr. Carlo Pirola

Dr. Daria Camilla Boffito

Dr. Carlos Escudero-Oñate

Dr. Maria Laura Tummino

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

The aim of this Special Issue is to collect papers that report research focused on any possible development of photocatalytic processes in air and water remediation.

Both theoretical and applied studies (focusing on investigating catalysts in realistic environments and improving stability) are of interest. Additionally relevant are reports that detail new possible plant and reactor configuration and simulation studies. The hope is to compile a set of manuscripts that contribute to the development of the state-of-the-art to transform laboratory studies in final concrete applications, following the principle “our recent studies, your future technologies”.
