## Molecular Mechanisms in Metabolic Disease 2022

Guest Editors:

**Dr. Louise Torp Dalgaard**

Eukaryot Cellebiologi, The  
Department of Science, Systems  
and Models, Roskilde University,  
Universitetsvej 1, 18.2, DK-4000  
Roskilde, Denmark

**Dr. Anandwardhan A.  
Hardikar**

NHMRC Clinical Trials Centre,  
Faculty of Medicine and Health,  
University of Sydney, Sydney,  
Australia

**Dr. Mugdha Joglekar**

NHMRC Clinical Trials Centre,  
Faculty of Medicine and Health,  
University of Sydney, Sydney,  
Australia

### Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to attract original reports, reviews, meta-analyses/systematic reviews, and short reports on understanding the potential molecular mechanisms underlying metabolic disease. We look forward to submissions that not only demonstrate new molecular mechanisms but also validate the existing research in addition to investigations into biomarkers of processes that lead to metabolic disease. This Special Issue will include articles related to type 1 and 2 diabetes, cardiovascular disease, obesity, lipid disorders, and related manifestations of metabolic syndrome. Submissions related to both existing and future therapies or treatment alternatives for metabolic disease are also welcome.

### Keywords

- insulin resistance
- cell therapy
- epigenetics
- obesity
- diabetes
- CVD
- ncRNA
- biomarkers
- molecular mechanism

Deadline for manuscript  
submissions:  
**closed (15 December 2022)**

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
