# **Regulatory microRNA**

Guest Editors:

Prof. Dr. Y-h. Taguchi Department of Physics, Chuo University, Tokyo 112-8551, Japan

#### Prof. Dr. Hsiuying Wang

Institute of Statistics, National Yang Ming Chiao Tung University, Hsinchu 300093, Taiwan

Deadline for manuscript submissions: closed (31 December 2018)

## Message from the Guest Editors

Dear Colleagues,

MicroRNAs (miRNAs), short non-coding RNAs, have been shown to be involved in the pathogenesis of many human disorders, ranging from cancers to autoimmune diseases. However, the role of microRNA in its detailed mechanisms about the initiation and progression of these diseases is still quite uncharacterized. Therefore, researches describe their mechanisms of actions, expression patterns and cellular pathways are especially important. This Special Issue seeks reviews and original papers covering a wide range of topics related to microRNA biology, such as miRNA therapeutics, miRNA regulation in various disorders (cancer, metabolism, autoimmunity or others), function of interactions between microRNAs and target genes, pathway analysis, and other related interesting topics.

# **Editors-in-Chief**

#### Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE, Minneapolis, MN 55455, USA

#### Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

### **Message from the Editorial Board**

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
