

Dear Colleagues,

As Editor-in-Chief of *Chemosensors*, I am pleased to announce the two winners of the Travel Awards 2018 sponsored by *Chemosensors*. The awards were granted to **William J Peveler**, Postdoctoral Research Fellow at University of British Columbia, and **Maria Mosshammer**, PhD student at University of Copenhagen. The awards consist of 800 Swiss Francs each to support attendance at any academic conference in 2018.

Dr. William J Peveler's research involves small molecule, macromolecule, solvothermal and nanoparticle materials synthesis, etc. He will attend the 2018 Gordon Research Conference State-of-the-Art Bioanalytical Sensing Approaches for Healthcare and Therapeutics, Forensics, and Visualization of Living Systems, from 24–29 June 2018 at Newport, RI, USA

Maria Mosshammer's work focuses on optical hydrogen peroxide (H₂O₂) sensors for environmental and biomedical applications. She will present her university's new findings at the 2018 Gordon Research Seminar on Oxygen Radicals, which will be held at Ventura, CA, USA from 3–4 February 2018.

It was a difficult decision with such high quality applications for the awards and we would like to thank all applicants for submitting their diverse and fascinating range of research topics. We congratulate the winners for their accomplishments.

Dr. Igor Medintz
Editor-in-Chief

2018 TRAVEL AWARD WINNERS

Chemosensors (ISSN 2227-9040; CODEN: CHEMA9) is an international, scientific, open access journal on the science and technology of chemical sensors published quarterly online by MDPI. It is indexed by Emerging Sources Citation Index (ESCI - Web of Science). For more information on *Chemosensors* please visit our website: <http://www.mdpi.com/journal/chemosensors>
