# **Thin Films for Advance Applications**

Guest Editors:

## Prof. Dr. Waseem Haider

School of Engineering and Technology, College of Science and Engineering, Central Michigan University, Mount Pleasant, MI 48859, USA

#### Prof. Dr. Maria Teresa Vieira

Centre for Mechanical Engineering, Materials and Processes, Department of Mechanical Engineering, University of Coimbra, Rua Luis Reis Santos, Polo II, 3030-788 Coimbra, Portugal

Deadline for manuscript submissions: closed (31 August 2018)

## Message from the Guest Editors

Dear Colleagues,

Thin films is an important field in materials science, electrical engineering, and applied solid-state physics. Advances in thin films during this century have enabled a wide range of technological breakthroughs in the fields of surface engineering, corrosion, energy generation and storage, microelectronics, computer manufacturing, and physical devices.

This Special Issue invites manuscripts on the synthesis, fabrication, processing, characterization, properties, and applications of thin films.

In particular, the topics of interest include, but are not limited to:

**Special**sue

- Synthesis and Fabrication
- Characterization and Applications
- Surfaces and Interfaces
- Nanomechanics of thin films
- Properties of thin films
- Thin film devices

# **Editors-in-Chief**

#### Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

#### Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. Coatings is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers on the hottest topics.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec,

CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
