## Early Career Stars of the Decade

Guest Editors:

**Prof. Dr. Charles Rosenblatt**

Ohio Eminent Scholar and  
Professor of Physics, Department  
of Physics, Case Western Reserve  
University, Cleveland, OH 44106-  
7079, USA

**Prof. Dr. Helen Gleeson**

Cavendish Professor of Physics,  
School of Physics and  
Astronomy, University of Leeds,  
Leeds LS2 9JT, UK

Deadline for manuscript  
submissions:

**closed (31 May 2020)**

### Message from the Guest Editors

Dear Colleagues,

The field of liquid crystals is constantly reinventing itself, evolving from measurements of elastic constants and devices such as the simple nematic twist cell in the 1970s to topological defects, nanoparticle inclusions, and smart sensors today. Many of these advances have been made by early career investigators, some trained within the liquid crystal discipline and many others entering the field from outside. These early career innovators bring excitement and fresh ideas, and make contributions that will influence the field for years to come. This issue highlights a number of high profile early investigators, all of whom have been active for less than 10 years since receiving their PhD degrees in 2010.

Prof. Dr. Charles Rosenblatt

Prof. Dr. Helen Gleeson

## Editor-in-Chief

**Prof. Dr. Alessandra Toncelli**

Department of Physics, University  
of Pisa, 56126 Pisa, PI, Italy

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
