Message from the Guest Editor

Dear Colleagues,

In recent years, there have been significant advances in the diagnosis and treatment of various gastrointestinal and liver diseases, such as colorectal cancer. However, there are also many diseases that have not made significant progress and remain stagnant. This new Special Issue focusing on advanced pathology and diagnostics in gastrointestinal and hepatic diseases aims to compile research and review articles on several fields of gastroenterology and hepatology. We invite research on diagnostic methodology, pathological basis, theranostics, novel therapeutic, prognostic and diagnostic biomarkers, and other related topics of gastrointestinal and hepatic diseases. Articles related to emerging artificial-intelligence-assisted diagnostics are also strongly encouraged. The artificial-intelligence-assisted tools may include, but are not limited to, medical imaging, digital pathology, endoscopic image and artificial intelligence algorithms. We look forward to receiving your contributions.

Dr. I-Wei Chang

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
