Message from the Guest Editor

Dear Colleagues,

The editorial team of *Diagnostics* is setting up a special issue on PET in cardiology and oncology. This issue will cover advances in PET methodology with special consideration of its application in the field of cardiology and oncology. Submissions will be invited covering the clinical role of PET in the work-up of patients with cardiovascular and oncologic diseases. In oncology, the publication will address detection, as well as therapy monitoring, of cancer using established imaging protocols. In addition, new radiopharmaceuticals will be discussed to learn about the diagnostic potential of molecular imaging in the area of cardiology and oncology.

Prof. Dr. Markus Schwaiger
