Message from the Guest Editors

Dear Colleagues,

Wine is an alchemie with unique properties; a rich and original composition in terms of polyphenols, and well known anti-oxidants. This explains why wine and health are closely linked to nutrition.

The focus of this special issue on wine and vine components and health of the journal "Diseases" will include the effects of wine on human physiology (cardiovascular, aged-linked disorders and s.o.); the effects of polyphenols as wine anti-oxidants and as signaling molecules; and from a humanity point of view, the tasting properties of wine.

Manuscripts (primary articles or review) providing new data and new concepts related to the following keys words are welcome: i.e. wine, vine and grape components including vitamins, minerals, ethanol and polyphenols such as resveratrol, and flavonoids; their bio-availability and metabolism; their effect on pathologies such as aging, longevity, cardiovascular, diabetes, cancer, obesity, inflammation, neurodegenerescence, cognition loss, pain, infection, skin problems, altered physical activity and s.o.

Prof. Dr. Norbert Latruffe

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental)
