### Facts about the MDPI Community

70 open access journals  
70 staff at your disposal  
4000 academic editors  
15,000 articles published  
26,000 e-mail alert subscribers  
60,000 unique authors  
150,000 academic peer-reviewers  
600,000 monthly PDF views  
2,400,000 monthly abstract views

MDPI AG  
Postfach  
CH-4005 Basel  
Switzerland

See [www.mdpi.com/about/contact/](http://www.mdpi.com/about/contact/) for a full list of offices and contact information. MDPI AG is a company registered in Basel, Switzerland, No. CH-270.3.014.334-3, whose registered office is at Kandererstrasse 25, CH-4057 Basel, Switzerland.

# *diversity* Call for Papers

## Call for Papers

Dear Colleagues,

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Diversity* (ISSN 1424-2818). *Diversity* is an online open access journal of the science and technology concerning diversity concepts and applications, diversity assessment and diversity preservation.

Manuscripts prepared in Microsoft Word or LaTeX can be submitted to the Editorial Office online at [www.mdpi.com](http://www.mdpi.com). Detailed instructions for authors are also available online: [www.mdpi.com/journal/diversity/instructions/](http://www.mdpi.com/journal/diversity/instructions/)

*Diversity* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published.

As an open access journal, *Diversity* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. More information is available at [www.mdpi.com/about/apc/](http://www.mdpi.com/about/apc/).

We would be pleased to welcome you as one of our authors.

*Diversity* Editorial Office  
E-Mail: [diversity@mdpi.com](mailto:diversity@mdpi.com)

## Aims & Scope

*Diversity* is focused on organismic and molecular diversity. It publishes reviews, regular research papers (articles) and short communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, there is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.

There are in addition two unique features: Comments on any related papers published in this journal and other journals can be published as short letters; Electronic files regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, will be deposited as supplementary material.

Subject Areas:

- general aspects of diversity assessment: mathematical models and computational methods
- organismic diversity
- biodiversity, ecosystems and diversity index
- diversity and molecular evolution
- diversity preservation strategies

*Diversity* regularly publishes special issues on relevant and timely topics. Be sure to check our website for an updated list of special issues: [www.mdpi.com/journal/diversity/](http://www.mdpi.com/journal/diversity/)

## Open Access. What Does It Really Mean?

Open access is mainly a response to what is known as the serials crisis: yearly increasing journal subscription prices, which make subscription-based journals increasingly difficult to afford.

Many university libraries around the world have had to cancel existing subscriptions, or are unable to keep up with subscribing to new journals, because the cost of publication has risen disproportionately to their budgets.

With open access publishing, the cost of peer-review and production of an article is borne by the institute of the author by payment of a one-time flat fee. Conversely, readers and their institutes are no longer charged for accessing the journals they need.

For researchers, open access brings the convenience of immediate access to the literature that they need—no matter for which university or company they work, or whether they just want to read a paper in their spare time at home.

For authors, open access means a much wider circle of readers due to the easy access to their research papers. The interested general public is also able to access research works, giving higher transparency to the outcome of taxpayer money spent on research.
