Message from the Guest Editors

Dear Colleagues,

Online teaching and learning bring new and unprecedented opportunities and possibilities to education at all levels, and at the same time, present various challenges. Some of the challenges are shared with traditional face-to-face settings, and some are unique to the online setting. For example, teachers may face challenges with identifying, selecting, and applying effective instructional strategies and appropriate technology needed in the design and development of a supportive learning environment as well as in the instructional process. Students may struggle with issues such as a lack of self-regulation skills, low engagement, and the need for social, mental, and psychological support during the learning process. Online teaching and learning are physically situated in the home and community environments. The resources and support available, or a lack thereof, in the learner's local environment play a critical role in the learning process. The fast-changing technology landscape presents another layer of complexity...
