### Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Long distance, efficient and reliable power delivery technologies.
- Power electronic apparatus for transmission and distribution
- New and innovative power-generation technologies;
- Cyber-physical systems, cyber-security and power system security
- Power quality technology to ensure the stability and reliability of power supply.
- Power system control, stability, modeling, computation, and optimization;
- Quality of supply, reliability and condition monitoring;
- Developments in power system measurement and instrumentation
- Demand side management technology to ensure efficient utilization of power resources.

We look forward to receiving your contributions.

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
