Deadline for manuscript
submissions:

closed (31 December 2024)

Message from the Guest Editor

Despite a few remarkable achievements, reinforcement learning is a field within artificial intelligence that has seen a relatively limited impact of deep learning techniques thus far. While neural networks have helped overcome some scalability issues associated with traditional methods, the fundamental methodologies have remained largely unchanged, leaving many traditional problems unresolved. There are several challenges that still need to be addressed or better understood in RL: sample efficiency and moving beyond the current “tabula rasa” approach, the exploitation vs. exploration dilemma, the lack of generalization and difficult adaptation to different scenarios, intrinsic vs. extrinsic rewarding systems, and intelligent transfer learning, among many others.

There is a widely held belief that solving the aforementioned challenges, which are interconnected to some extent, requires a significant paradigm shift in the field of RL. This shift is likely to be centered around a more comprehensive and extensive utilization of deep learning techniques.

an Open Access Journal by MDPI

Editor-in-Chief

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), [Inspec](#), [Ei Compendex](#) and [other databases](#).

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)
