

Integration of Electric Vehicle Chargers and Energy Storage Systems in Smart Grids

Guest Editors:

Dr. Riccardo Mandrioli

Dr. Mattia Simonazzi

Dr. Vítor Monteiro

Prof. Dr. Sheldon Williamson

Deadline for manuscript
submissions:

15 October 2024

Message from the Guest Editors

Dear Colleagues,

EVs are becoming increasingly popular as a sustainable mode of transportation, capable of enabling an effective green transition when integrated in renewable-fed smart grids. Energy storage systems have become crucial in helping to manage the variability of power production from renewable energy sources and in allocating energy for high power loads, ensuring a stable and reliable electricity supply.

Power network interfaces with EVs and ESSs through power converters, which effectively drive the whole infrastructure. Their architecture and control algorithms play a crucial role in the future development of the grid. Furthermore, their diffusion reveals the need to also consider electromagnetic compatibility issues, both on individual devices and on the smart grid, in which the aggregation of disturbances can compromise the functioning of the network itself.

The design of EV chargers and ESSs and their integration into the electric infrastructure must therefore be addressed with awareness of the power system architecture, as well as control and electromagnetic compatibility issues, ensuring the transition towards a more sustainable and resilient energy system.

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
