Haptic Systems and the Tactile Internet: Design and Applications

Guest Editors:

Dr. George Kokkonis

Department of Information and Electronic Engineering,
International Hellenic University,
57400 Thessaloniki, Greece

Prof. Dr. Konstantinos E. Psannis

Department of Applied Informatics, University of Macedonia, 54636 Thessaloniki, Greece

Dr. Sotirios Kontogiannis

MicroComputer Systems Laboratory Team, Department of Mathematics, University of Ioannina, 45110 Ioannina, Greece

Deadline for manuscript submissions:

closed (15 July 2025)

Message from the Guest Editors

This Special Issue seeks to address various aspects of haptic technology and the Tactile Internet, including design methodologies, sensor technologies, communication protocols, and application scenarios. It aims to provide a platform for researchers, engineers, and practitioners to exchange ideas, share insights, and discuss emerging trends in the design, implementation, and utilization of haptic systems and the Tactile Internet.

Topics of interest include, but are not limited to, the following:

- haptics in virtual reality, augmented reality, healthcare applications, gaming, rehabilitation, human–computer interaction, assistive technology;
- haptics for visually impaired people;
- haptics for people with fine motor problems;
- haptics for education and training;
- haptic interaction design guidelines;
- haptic interfaces for accessibility;
- haptic communication and teleoperation;
- haptic perception and psychophysics;
- haptic feedback in human–computer interactions;
- wearable haptic devices;
- haptic rendering algorithms.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and
Telecommunications,
Politecnico di Torino, 10129
Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Signal Processing)
