

Recent Advances in Virtual Reality and Computer Vision Based on Deep Learning

Guest Editors:

Dr. Pedro Javier Herrera Caro

Department of Computer
Systems and Software
Engineering, School of Computer
Engineering, National Distance
Education University (UNED),
28040 Madrid, Spain

Dr. Jaime Duque-Domingo

Department of Systems
Engineering and Automatics,
University of Valladolid, 47002
Valladolid, Spain

Deadline for manuscript
submissions:

closed (15 March 2025)

Message from the Guest Editors

Dear Colleagues,

Deep learning is a very powerful branch of machine learning, framed within artificial intelligence, and represents a very promising field of knowledge that is continually on the rise, in part thanks to technological advances which allow the processing of enormous amounts of data with complex structures. The fullest realization of these are neural networks, more specifically those classified as deep. It is evident that AI is a promising field with multiple and diverse practical applications, representing a very active area of research, in which abundant intelligent systems have flourished and facilitate and automate routine work.

The following is a list of the main topics covered by this Special Issue concerned with computer vision based on deep learning models:

- Voice and audio processing;
- Natural language processing;
- Robotics;
- Bioinformatics;
- Video games;
- Search engines;
- Economy and finance.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Sergio Busquets-Monge

Electronic Engineering
Department, Universitat
Politécnica de Catalunya, 08028
Barcelona, Spain

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Signal Processing)
