

Recent Advance of Computing Power Networks at the Edge

Guest Editors:

Prof. Dr. Yi Gao

College of Computer Science and
Technology, Zhejiang University,
Hangzhou 310027, China

Dr. Jiamei Lv

School of Software Technology,
Zhejiang University, Ningbo
315048, China

Deadline for manuscript
submissions:

15 July 2024

Message from the Guest Editors

In the era of the Internet of Everything, the surge in computing demands is presenting significant challenges. The conventional architecture of cloud computing falls short in terms of meeting the stringent requirements of latency, bandwidth, security, and privacy for massive data processing. As the number of endpoint devices continues to grow, the migration of cloud computing tasks, to the edge has emerged as a pivotal technological trend.

Nevertheless, edge computing resources are inherently constrained and costly compared to their cloud counterparts. Consequently, exploring the possibilities to establish a cost-effective, efficient, and resilient computing power network at the edge of interest as a research topic.

Potential submission themes include, but are not limited to, the following areas:

- Communication infrastructure for computing power networks at the edge;
- Programming models and toolkits for computing power networks at the edge;
- AI services on the edge;
- Emerging applications at the edge;
- Resource management for computing power networks at the edge;
- Security and privacy issues of computing power networks at the edge.

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Electrical and Electronic Engineering*) CiteScore - Q2 (*Electrical and Electronic Engineering*)
