Deadline for manuscript submissions: closed (15 June 2023)

Message from the Guest Editors

Dear Colleagues,

With the increasing penetration of power-electronicsbased technologies (e.g., wind and photovoltaic generators, electric vehicle chargers, energy storage systems) in distribution systems, new power quality issues are emerging. It is essential to develop techniques that take advantage of these available data and provide actionable information for utilities to anticipate and mitigate such power quality issues.

This Special Issue aims to gather articles which cover a vast range of applications for different types of measurement data (rms, phasor, and waveform measurements) available in modern power systems, which shall include (but are not limited to) measurement-based methods to anticipate, detect and mitigate new power quality issues that are emerging in circuits with a high penetration of inverterbased resources (IBRs). New methods and approaches to detect and mitigate traditional power quality issues such as voltage sags/swells, flicker and voltage unbalance are also welcome.

Keywords

- power quality
- data analytics
- inverter-based resources

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases. **Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
