and Biomedical Informatics,
University of Thessaly, 35131
Lamia, Greece

Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editor

Dear Colleagues,

The focus of this Special Issue is on the research challenges related to the design of emerging microelectronics and VLSI circuits and systems that meet the demanding specifications of innovative applications. This Special Issue considers challenges in the fields of low power consumption, small integration area, testing and security, without, however, being limited to them. Authors are encouraged to submit works related to emerging research topics and applications, such as hardware security, low-power IoT devices, high-performance processing cores, etc.

The topics of interest include, but are not limited to:

- Device modeling
- Emerging technologies
- CAD for VLSI design
- Hardware/software co-design
- Testing and verification
- FPGA-based design
- Embedded systems
- IP cores
- Low-power circuits and systems
- Hardware security
- Emerging applications
- VLSI for AI and ML algorithms

an Open Access Journal by MDPI

Torino, Italy

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank: JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Signal Processing)
