Numerical Heat Transfer and Fluid Flow 2023

Guest Editor:

Prof. Dr. Artur Bartosik

Department of Production
Engineering, Faculty of
Management and Computer
Modelling, Kielce University of
Technology, 25-314 Kielce,
Poland

Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editor

This Special Issue on “Numerical Heat Transfer and Fluid Flow” in the scientific journal *Energies* is addressed to specialists from all over the world who deal with mathematical modeling and experiments on heat and fluid flow. We welcome papers dealing with solutions of problems of scientific and industrial relevance in the broad fields of heat transfer and fluid transportation, including natural resources, biomedical, industrial processes, etc. Papers addressed to the Special Issue will not only solve specific engineering problems, but will serve as a catalyst on future directions and priorities in numerical heat transfer and fluid flow.

Topics of interest for publication include, but are not limited to, the following:

- Numerical simulations of mass and/or heat transfer;
- Computational fluid dynamics;
- Experiments and simulations of single or multiphase flows, including Newtonian and non-Newtonian fluids;
- Modeling, optimization, and control of heat transfer and fluid flow;
- Mini and macro-flows;
- Turbulence;
- Modelling of turbulence;
- Flowing phase interactions;
- Energy saving processes, including increase or decrease in frictional losses and/or heat transfer.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
