## Carbon Footprinting and Life Cycle Assessment

Guest Editors:

**Dr. Arne Geschke**

**Dr. Francesco Pomponi**

**Dr. Timothy M. Baynes**

**Dr. Peter Daniels**

**Dr. Ka Leung Lam**

**Dr. Arunima Malik**

**Prof. Dr. Manfred Lenzen**

Deadline for manuscript  
submissions:

**closed (25 August 2020)**

### Message from the Guest Editors

Dear Colleagues,

Carbon emissions are inevitably linked to lifestyle and consumption behaviours, and the concept of “carbon footprinting” is now a well-recognised beyond academia. Life cycle assessment (LCA) is one of the primary tools for assessing carbon footprints. LCA techniques offer a large range of applicability, from assessing individual industrial processes at a local level to investigating global carbon footprints. LCA for carbon assessment enjoys a high popularity, both in academia and in the corporate world. This Special Issue will give an overview of the current state-of-the-art of the LCA techniques, capabilities and data sets, and also the latest projects.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
