Message from the Guest Editors

Dear Colleagues,

The increasing level of competitiveness of world countries in areas considered to be "green" including green transformation, green technologies or green jobs is currently one of the most important strategic goals set for the economies of the world's countries. We are looking for both research papers and comprehensive reviews related to green economy and sustainable energy finance. The following potential areas for this Special Issue are welcome; however, the list of research fields is not exhaustive:

- models and patterns of development in the field of green energy transformation of the world's countries,
- proposals for defining and measuring the relationships between green transformation and sustainable energy finance,
- green economy and sustainable energy finance – how they work together?
- green economy, green energy transformation and sustainable energy finance – opportunities and challenges,
- methods and measurements for green economy, green energy transformation and sustainable energy finance.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
