Prof. Dr. Nigel D. Browning

Pacific Northwest National
Laboratory, School of
Engineering & School of Physical
Sciences, University of Liverpool,
Liverpool L69 3GQ, UK

Prof. Dr. Sara Walker

Professor in Energy, Director of
The Centre of Energy, School of
Engineering, Newcastle
University, Newcastle upon Tyne
NE1 7RU, UK

Message from the Collection Editors

Dear Colleagues,

We are inviting submissions to a Special Issue of *Energies* on “Advanced Energy Materials and Research”.

The increasing energy demand and consumption due to growing global population and the critical relationship between energy, environment, and sustainability lead to novel discoveries and advancements in the field of energy materials in search of alternative resources as well as recycling and reuse of energy materials. The transformation of conventional fossil fuel to renewable and sustainable energy sources due to the geophysical and social stress results in the development of advanced energy materials to support emerging technologies. The emerging materials for energy associated application include but are not limited to photovoltaic, batteries, fuel cells, nanostructured materials, and light sources.

In this Special Issue of *Energies*, original research articles or reviews on topics related to advanced energy materials and their characterization are welcome.

- solar energy
- fuel cell
- batteries
- electrolytes
- nanomaterials
- polymers
- semiconductor
- graphene
- biomaterials
- recycling and reuse of energy materials

Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
