## Smart Thermostats for Energy Saving in Buildings

Guest Editor:

**Dr. Therese Peffer**

California Institute for Energy and  
Environment, University of  
California, Berkeley, CA 94720,  
USA

Deadline for manuscript  
submissions:

**closed (2 March 2022)**

### Message from the Guest Editor

Dear Colleagues,

The Guest Editor is delighted to invite submissions to a Special Issue of *Energies* entitled “Smart Thermostats for Energy Savings in Buildings”. Thermostats are now more often networked and embedded devices, as part of the Internet of Things, and thus considered “smart”. These advanced thermostats enable demand response and use of heating ventilation and air conditioning (HVAC) equipment as distributed energy resources (DERs) towards a more resilient and effective utility grid.

Topics of interest for publication include, but are not limited to:

- Advanced or specialized thermostat user interfaces;
- Feedback for improved energy savings;
- Advanced control and machine learning algorithms that reduce energy;
- Data fusion and social data mining for designing advanced connected thermostat functions;
- Commercial building energy management;
- Enabling HVAC as DER;
- Networked thermostats integrated with other systems (e.g., ceiling fans) for energy savings;
- Improved thermal comfort and energy savings optimization;
- Advanced ventilation strategies.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
