Message from the Guest Editor

Dear Colleagues,

This Special Issue invites researchers from academia and industries to submit novel ideas, best practices, and case studies on energy conservation in infrastructures, such as commercial and residential buildings, towers, and houses, and government and public facilities, as well as transportation and roads.

Short and regular papers are expected to discuss challenges in energy conservation measures, analysis, control, and optimization for energy supply, storage, and conversion technologies that cover thermal, gas, and electricity systems.

Prof. Dr. Hossam A. Gabbar (Gaber)
Guest Editor

Author Benefits

- **Open Access:** free for readers, with publishing fees paid by authors or their institutions.
- **High visibility:** indexed by the Science Citation Index Expanded (Web of Science), EI Compendex, Scopus and other databases.
- **Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 31 days after submission; acceptance to publication is undertaken in 8 days (median values for papers published in this journal in 2016).
