Message from the Guest Editors

Dear Colleagues,

The Second Energy Future Conference (www.ozenergyfuture.com) will focus on energy storage—from generation to distribution, and cover international advances in the area. As part of the Energy Future Conference, we are inviting publications in the particular areas of energy storage including generation, distribution, policy, and social dimensions. Energy storage is central to the challenges facing society in the 21st century, i.e., how to transition to sustainable energy systems. The challenges are also in the implementation of new technological solutions re-shaping the energy sector, at the grid and off-grid levels, for mobility, but also industrial, commercial, and residential buildings.

Prof. Dr. Kondo-Francois Aguey-Zinsou
Dr Da-Wei Wang
Dr Yun-Hau Ng
