## **Message from the Guest Editors**

Dear Colleagues,

The purpose of the current Special Issue "Energy Storage and Flow Batteries" is to publish the most exciting research with respect to the above subjects and to spread the articles freely for research, teaching, and reference purposes. The topics cover a wide range of subjects in flow battery research including numerical and experimental modeling, flow field configurations, new electrode and ion-exchange membrane materials, electrolyte chemistries, and charge–discharge performance.

## **Message from the Editor-in-Chief**

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
