Canada

Deadline for manuscript
submissions:

closed (31 July 2011)

Message from the Guest Editor

Dear Colleagues,

A global consensus is emerging on the need to mitigate the accumulation of greenhouse gases in the atmosphere. This will require technical adaptation of existing energy technologies and the development of new ones. Research, development and commercial application of new technologies focused on a reduced GHG impact are widespread. This issue is dedicated to those technologies that have the potential to impact GHG accumulation in the atmosphere.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
