Message from the Guest Editor

Dear Colleagues,

We reopen the call for submissions of manuscripts to the volume "Geometry in Thermodynamics." Our updated call is intended to accommodate a somewhat-expanded span of topics, new researchers in the field, as well as anyone else who would like to contribute at this point. We welcome articles on symplectic geometry, contact geometry, inner product geometry, metric geometry, information geometry, and Legendre invariant geometry. Applications can include finite-time thermodynamics, fluctuation phenomena, black hole thermodynamics, and phase transitions. In addition, we invite articles related to model evaluations, quantum phase transitions, stochastic thermodynamics, machine learning, control theory, computer vision, optimal transport theory, and Wasserstein geometry. Geometry of thermodynamics is a growing area of research, with many new contributions in a number of areas.

Prof. Dr. George Ruppeiner
Guest Editor

Author Benefits

Open Access: free for readers, with publishing fees paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MathSciNet (AMS), INSPEC (IET), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 33 days after submission; acceptance to publication is undertaken in 6 days (median values for papers published in this journal in 2016).
