Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Fluids* is dedicated to the applications of non-equilibrium thermodynamics to multi-phase flows including flows of emulsions (two-phase liquid/liquid systems), suspensions (solid particles/liquid systems), foams (gas bubbles/liquid systems), and other complex fluids. Experimental and theoretical studies dealing with the applications of classical irreversible thermodynamics (CIT) and extended irreversible thermodynamics (EIT) to flow and rheology of multi-phasic systems are welcome. Entropy production and energy destruction in multi-phase flows with simultaneous heat and or mass transport, with and without chemical reactions, are also welcome. The applications of non-equilibrium thermodynamics in the design and optimization of multi-phase flow processes would be considered as well.

Prof. Dr. Rajinder Pal

Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q2 (Mechanical Engineering)
